

DUMP BAILERS

More Durable Material & Design

Yellow Jacket dump bailers are more durable with heavy-duty materials and a standalone window sub. Threaded holes in the window sub allow access for grounding and suspending conductor wiring. Fluted wrench surfaces improve grip and create a more productive, safe tool.

Increased Durability

- 304 stainless steel body resists corrosion, especially when used with acid
- Heavy-duty wall tube reduces bending damage
- 4140 steel, heavy-wall end fittings

Standalone Window Sub

- Window positioned in a standalone sub to reduce bending risk
- Threaded holes in the window sub facilitate grounding and suspending the conductor wire

Better Grip

- Increased wrench grip and torque for faster tool configuration assembly and disassembly
- Pipe wrench is less likely to slip and injure the user

Compatibility

- Multiple sub configurations available: top/window/bottom
- Compatible with industry standard top threads

Optional Configuration: Bump & Dump Bottom Sub

- Spring loaded rod breaks glass when actuated

Part Numbers

3 1/8" Diameter Dump Bailer

DB.TS.31.A	Top Sub
DB.WS.31.A	Window Sub
DB.BS.31.A	Bottom Sub – Plain Bottom
DB.BD.31.A	Bottom Sub – Bump and Dump
DB.BJ.31.05A	5' Bailer Joint, Stainless Tube, Welded
DB.BJ.31.10.A	10' Bailer Joint, Stainless Tube, Welded

ABOUT YELLOW JACKET OIL TOOLS

Build guns faster and smarter – with tools that are more productive, durable, and safe.

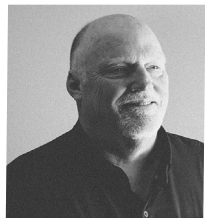

Yellow Jacket Oil Tools is a full-service distributor of downhole completion tools and oilfield perforating systems, specialized in building tools that improve wireline performance, enhance safety, and stretch our clients' dollar as far as it can go.

Time is critical in downhole operations. Rapid and reliable response from primary suppliers is vital to the success of any wireline operation, and anticipating what tools are required for tomorrow's job can be difficult.

Our knowledgeable sales team is on call 24/7, ready to field your call and deliver the right tools right away. Many deliveries are made through Regional Distribution Warehouses strategically located in each major oil producing region. Yellow Jacket Oil Tools is a division of G&H Diversified Manufacturing, LP, an ISO 9001:2015 certified, American-owned advanced contract manufacturer, serving a range of industries since 1958.

Warehouse Locations | Convenient Distribution

When you need tools, you need them fast. Major U.S. and Canadian shale plays are served by the Yellow Jacket Oil Tools warehouses shown on the maps above and below.
