

PULL & PLAY™ PERFORATING GUN SYSTEM (DH2)

Pull & Play™ guns ship loaded and armed.

Guns loaded with value. Perf faster at a better cost per run.

The Pull & Play™ Digital Hybrid Gen-2 (DH2) Gun System is built on the legacy Pre-Wired Complete (PWC) Gun System with millions of runs. The beauty of this next evolution system is the ability to offer it *loaded & armed*, delivered straight to your shop. Yellow Jacket is the only perforating gun manufacturer with the patented technology, approved by DOT and Transport Canada, for on-highway transportation.

Solid Design

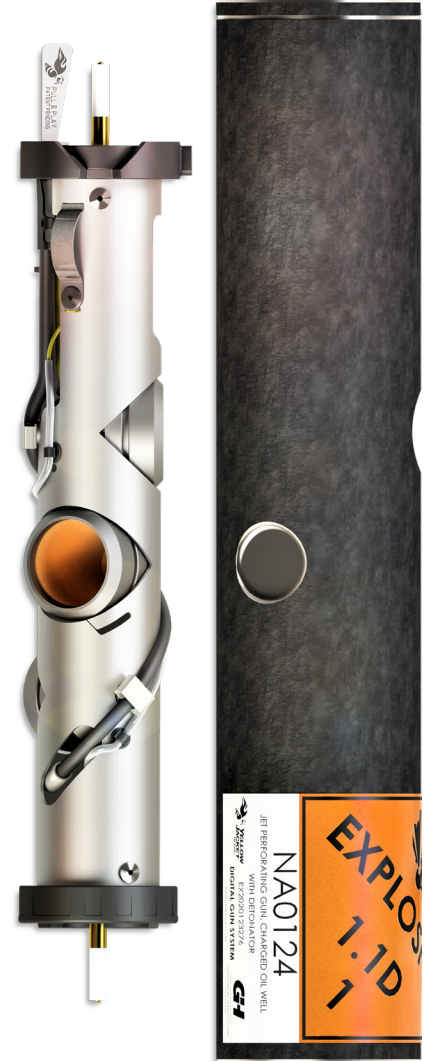

- Next-Generation plunging gun contact connection on both ends of charge tube
- Dual ground springs provide direct ground path between addressable switch and gun body
- Compatible with any brand of switch and shaped charge
- Designed for ease of use - remove the thread protector, remove the ballistic interrupter, and install the tandem sub.

More Reliable

- No ports in gun string
- No wires between gun assemblies and mating subs
- Assembled in factory setting
- Compatible with Yellow Jacket's exclusive Plug Shoot Firing Head and Direct Connect Sub
- Premium materials with full traceability qualified through comprehensive testing protocols
- Oriented systems available

Patent-Pending Ballistic Interrupt

- The system is designed for the oilfield- proven Austin Powder A-140S Detonator
- The detonator is positioned for side initiation of the detonating cord and includes a ballistic interrupter for safe transport and handling prior to use

Remove thread protector,
Remove ballistic interrupter
→ Ready to install tandem sub & next gun

PULL & PLAY™ PERFORATING GUN SYSTEM (DH2)
